DATA SCIENCE BOOTCAMP- LHR

MODULE 6

Data Science Challenge

- Apply your knowledge that you have gained in the past two days and build a Machine Learning model using Microsoft Azure ML Studio.

Data Dictionary

- The data dictionary of the challenge could be found in the following link:

- https://github.com/ahadmushir/MSDSBOOTCAMP/tree/master/Competition

Data Set

- The dataset for this challenge could be found in the following link:
- https://github.com/ahadmushir/MSDSBOOTCAMP/tree/master/Dataset
- We will be using "**Student Performance – Training.csv**"

Evaluation Criteria

- For scoring, each of the contestants would be require to provide their azure model API key (As shown in the previous slides)

- Evaluation for this exercise is based on Accuracy.

Duration

- All of the contestants have this day to complete this challenge till 3 p.m.

- After making a model, kindly share your deployed model API key and URl in the following google form:

- https://goo.gl/forms/pJ3mKFbqhae03dpR2

- Our team will take the rest of the time for your model evaluation.

- Results will be announced shortly.
